Inside the quiet, palatial walls of Design Miami Paris

A recap of the standout pieces and galleries on show in Karl Lagerfeld's former home.

WRITER Chloé Nakao-Pélata

This week gallery representatives, advisers and collectors alike have been crowding into Karl Lagerfeld's former home at the Hôtel de Maisons in Saint-Germain-des-Prés for Design Miami Paris. Prices, provenance and acquisitions were discussed in hushed tones as the design and art market got down to business at the event.

At the presentation of "Around a Desk", Galerie Scène Ouverte turned the 18th-century room into a sculptural office space. Made from peeled and unfurled layers of *maillechort* (nickel silver), Studio Lugo's desk and library evoke the organic. "The manufacturing process is not concealed; it is highlighted, embraced and placed at the very heart of the creative gesture. A sculptural horizontality serves a functional object whose layers of metal unfold like geological strata or petals", says founder Laurence Bonnel.
